

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

Ordered, That the Honorable Mr. Gouin, have leave to bring in a Bill (No. 1) respecting the administration of Oaths of Office.

He accordingly presented the said Bill to the House, and the same was received and read for the first time.

Mr. Speaker reported, that when the House did attend His Honor the Lieutenant-Governor, this day, in the Legislative Council Chamber, His Honor was pleased to make a speech to both Houses of the Provincial Legislature, of which Mr. Speaker said he had, to prevent mistakes, obtained a copy, which he read to the House, as followeth :

Honorable Gentlemen of the Legislative Council,

Gentlemen of the Legislative Assembly,

In welcoming you on your return to your parliamentary labours, it is a great pleasure to me that the first words I have to utter should be to publicly state that our Province has suffered but little from the economic and financial crisis that has been so severely felt elsewhere.

Since last session, the Imperial Parliament has passed an act confirming the increase in the subsidies which the representatives of the federal authorities had promised at the inter-provincial conference of 1906. Through the efforts of my Government, it was provided that the statute, although passed in the month of August, should take effect from the 1st July and we consequently received the additional subsidy some time afterwards.

In applying to the courts to protect our territory against the encroachments of the Newfoundland authorities, my Government has not discontinued the negotiations it had previously begun in connection with the establishing of the boundary between that country and ours, and I am happy to inform you that the Newfoundland Government has accepted our proposal to submit the question to the decision of the Judicial Committee of His Majesty's Privy Council.

The annexation of Ungava to our Province continues to be urged by us upon the Ottawa Government. The latter has not yet granted our request, but there is every reason to hope that it will soon do so.

The laws governing the administration of municipal matters in our

country districts should be such as to admit of easy interpretation and to meet present conditions and needs. Our Municipal Code no longer satisfies these requirements and you will be called upon to consider a Bill to authorize its revision.

The business before the courts in some districts of our Province has grown to such an extent that it has become necessary to adopt measures to facilitate its despatch. Bills will therefore be submitted to you respecting the re-organization of the criminal courts having jurisdiction in summary trials, the appointment of additional judges to the Superior Court of the district of Montreal, and various other matters connected with the administration of justice.

The increase of crime in certain parts of the Province, especially those whither the current of immigration chiefly tends, is the object of the earnest attention of my Government, and it is firmly resolved to neglect nothing to secure the safety of person and property.

The third report of the commission appointed to revise our statutes will be submitted to your consideration without delay. You will also be asked to pass an act putting the revision into force.

My Government is actively engaged in organizing the two technical industrial schools and the school for higher commercial studies, the foundation of which you authorized last session, and I believe I am in a position to inform you that their establishment will shortly be an accomplished fact.

Two new normal schools have been founded: one at Three Rivers and the other at Nicolet, for the purpose of training a sufficient number of competent school mistresses and thereby furthering the progress of instruction in our primary schools.

To induce the school commissioners to increase the school-mistresses' salaries and encourage the latter to persevere in their career, further yearly bonuses will be paid to the most deserving school municipalities and to school-mistresses who teach for more than ten years.

My Government likewise proposes to give special grants to poor municipalities to help them to replace defective school-houses by new ones, built on plans approved by the Department of Public Instruction.

I observe with pleasure that progress in agriculture is becoming more and more marked every day. Owing to better inspection, farm produce is now of superior quality and our farmers can sell it at increasingly remunerative prices.

My Government has increased the grant to the Oka agricultural school, in order that the education imparted by that institution may be more thorough. I am convinced that this action will meet with your approval.

The act respecting rural roads passed last session has already produced good results. My Government desires, however, to still further favour the improvement of our means of communication and it will, therefore, ask you to authorize it to provide still further for the bettering of roads and the construction of iron bridges.

Colonization evidently feels the effects of agricultural prosperity. Never

have our lands been more sought after by settlers. The Government is doing all in its power to encourage the settlement of our public domain and to facilitate the work of our pioneers.

The students sent by the Province to follow the course of the Yale Forestry School, are now engaged, under the direction of the Department of Lands and Forests, in establishing a nursery for the propagation of forest trees. This project, which will enable us to attempt the afforestation of certain sections of our territory, is in a fair way of being carried out.

The commission appointed to consider the question of accidents to workmen has not yet completed its enquiry. It has already heard many witnesses and I hope that the report it will make to you before long, will help you in preparing legislation that will protect the rights both of employers and employed.

My Government will ask you to pass an act to secure the payment of proper wages to workmen employed on public contracts or works subsidized by the State.

The frequency of accidents caused by fire in public buildings has rendered the adoption of fresh measures necessary. A bill for the consolidation of our laws, compelling the owners of such buildings to take additional precautions, will be submitted to you.

The question of the guarantees offered by insurance companies doing business in the Province, keenly engages public attention. To remove the uneasiness felt on this score, my Government will submit a measure to you, regulating the organization, control and administration of such companies.

You will also be called upon to consider the advisability of appointing an Agent General to represent the Province in the United Kingdom, to promote the development of our agricultural, commercial and industrial relations with it.

Very soon three hundred years will have elapsed since the foundation of Quebec. This is an event that should be commemorated, and I have no doubt that every inhabitant of this Province wishes that it be properly celebrated. My Government deems it its duty to contribute to the success of the jubilee celebration which is being prepared and will ask you to vote an appropriation for that purpose.

Gentlemen of the Legislative Assembly,

The estimates for the coming and the Public Accounts for the past year, will be submitted to you forthwith.

You will no doubt be happy to see, that during the past year the receipts have greatly exceeded the expenditure, although unforeseen exigencies had to be provided for and no timber limits were leased. The results of the current year will probably be equally satisfactory.

You will be asked to vote larger appropriations for Public Instruction, Agriculture and Colonization.

Honourable Gentlemen of the Legislative Council,

Gentlemen of the Legislative Assembly.

You will be called upon to legislate upon several other subjects of general interest, such as the administration of public lands, mines, fisheries and game, co-operative agricultural associations, civil procedure and the indemnity payable to jurors.

I am confident that you will carefully study the various matters submitted to your attention and that your decisions will be inspired solely by your respect for justice and your solicitude for the public weal.

Mr. Speaker communicated to the House, a Report of the Librarian of the Legislature of the Province of Quebec, on the state of the Library, as follows :

To the Honorable Speaker and Honorable Members of the Legislative Assembly

The Librarian has the honor to submit his report for the recess of 1907-1908.

Since the opening of the last session the Library has acquired 1300 volumes and 360 pamphlets through purchase, exchange or private gifts.

The present number of volumes in the library is 71,550 and that of the pamphlets is 18700. About one half of the above number are in the library, and the other half are scattered in six different rooms, some in the attics and others in the basement of the Government Buildings. Such a regrettable anomaly will not disappear until a new building is erected and adapted for receiving within its walls the mass of volumes now unavoidably kept from public view. May that day soon come in all justice to the Province in the first place and also to those who devote their efforts to securing the prosperity of so useful and so interesting a thing as a library.

The impetus so generously given to technical studies in past years induced the librarian to purchase what might be called a library on the subject. Thus he has acquired on fairly favorable conditions 81 volumes published in the English language, containing the works of the most competent authors on the various branches of human industry. The librarian further proposes to purchase shortly some French works on the same subjects under various aspects. The library will thus possess before long a department of technical works which may be consulted with the greatest profit.

The whole respectfully submitted,

N. E. DIONNE,

Librarian of the Legislature.

QUEBEC, 30th September, 1907.

HON. LOMER GOUIN,

Prime Minister,

Quebec.

SIR,

For some months past I have been the object of the most violent attacks on the part of the adversaries of the Government who have had the most defamatory charges published in the press in connection with the administration of my department.

After conferring with you, I brought one of my traducers before the courts and the case is still pending.

From conversations we have had together on the subject, I understand that, while admitting the honesty of my administration, you cannot but be annoyed at these continued attacks against one of your Ministers and I do not conceal from myself the fact that in the Asselin trial, it is claimed that he has the whole Government against him. I realize all this. I wish to fight my adversaries with equal weapons and thus I wish to meet them in the course of the investigations you have promised to grant and even to insist upon.

I therefore tender you my resignation as Minister of Colonization, Mines and Fisheries, with the certainty that you will give me the advantage of defending my administration so unfairly attacked.

I consider that this is the only line of conduct due to myself, to my family, to my province and to my party.

I therefore beg you to lay my resignation before His Honor the Lieutenant Governor and to accept for yourself the expression of my best consideration.

Yours very truly,

(Signed) JEAN PRÉVOST.

By Mr. Mackenzie.—1. Has the Government been informed as to the want of sufficient safeguards against accident by fire in many of the schools in the city of Montreal?

2. Has the Government been furnished with any information as to a recent inspection made of the Protestant schools of Montreal through the Montreal "Herald"?

3. Is it the intention of the Government to take steps to see that the said buildings are properly safeguarded in order to prevent loss of life?

Answer by the Honorable Mr. Taschereau :—

1. After the fire at the Hochelaga school, the inspectors inspected all the schools in the city and banlieu of Montreal, accompanied by the Catholic and Protestant school commissioners of Montreal, Westmount, St. Louis, St. Paul, etc., and ordered what was necessary to be done for the safety of the children and teachers. According to the inspectors' reports, out of 198 schools inspected, there were still about twenty that were not as they should be. The inspectors are now making fresh inspections to hasten the changes ordered.

2. A file of newspapers, containing articles from the *Montreal Herald*, on the subject, was received at the Department of Public Works on the 15th instant.

3. Yes ; the Government will shortly submit legislation on the subject.

By Mr. Tellier.—1. How long has there been a vacancy in the office of Prothonotary of the Superior Court of the District of Quebec?

2. Why has such vacancy not yet been filled?

3. Is the Government aware that the Honorable Judge Lemieux complained in Court, this week, that this office is still vacant and declared that on that account the office was in a state of disorder?

4. When will the said vacancy be filled?

Answer by the Honorable Mr. Gouin :—

1. The prothonotary died on 21st June, 1907.

Article 2338 of the Revised Statutes, enacts that the deputy-prothonotary performs the duties of the prothonotary in the event of the death of the latter. One of the said deputy-prothonotaries was directed by the Attorney-General to take charge of the Prothonotary's office and he still acts as prothonotary.

2. The Government deemed it in the public interest to proceed as it has done.

3. No observation of Mr. Justice Lemieux was officially brought to the knowledge of the Government which hesitates to place any faith in what appeared in the newspapers on the subject inasmuch as no judge or member of the Bar has made a complaint and moreover the appointment of the officers of justice is outside the jurisdiction of Mr. Justice Lemieux.

4. A person will shortly be appointed to the office of prothonotary.

By Mr. Langlois.—Does the Government intend to give a grant to the French school of elocution of Montreal?

Answer by the Honorable Mr. Roy :—
Under consideration.

By Mr. Langlois.—1. How many municipalities in the Province of Quebec have refused to comply with the regulation which obliges them to supply the teachers with the fuel necessary to heat their school-houses?

2. What municipalities?

Answer by the Honorable Mr. Roy :—

In the cases which have come to the Superintendent's knowledge, the school boards, which were very few in number, who thought that they were not obliged to supply the fuel to heat the school houses, did so upon being informed of their obligations.

By Mr. Langlois.—1. Is the Government aware that the meat consumed in Montreal is not inspected, while in the same city, that intended for foreign export or shipped to other provinces is carefully inspected each day by special officials?

2. Is the Government aware that these officials confiscate large quantities of meat every day as not fit to be eaten?

3. Has the Provincial Board of Health made any representations to the Government on the subject.

4. If not, does the Government intend to take any steps to remedy the present state of affairs?

Answer by the Honorable Mr. Roy :—

1. Under the act respecting the inspection of meats and canned foods, sanctioned on the 27th April, 1907, the Federal Government organized a special service, in Montreal, in October last, for the inspection of meats intended for export; but this federal service did not in any wise put a stop to the municipal inspection of meat for consumption, in the city of Montreal. That Municipal service existed long before the organization of the federal service, which is a special one.

2. There is no doubt that the twelve federal inspectors stationed at Montreal for the inspection of meat intended for export, must report many confiscations to the Government under whose orders they are, for in the month of February last alone, the inspectors in the service of the municipal board of health of Montreal, confiscated, on their part, 105 whole carcasses of animals, besides 25,773 lbs of meat intended for consumption in Montreal itself.

3. The Board of Health of the Province of Quebec has made no representations to the Government to the subject.

4. If necessary, the duty of improving the municipal service in connection with foodstuffs in Montreal, would lie there, as in the thousand other municipalities of the Province, with the municipal corporation of the city which has extensive powers in the matter under its charter.

By Mr. Delage.—1. Has the Honorable Provincial Secretary received a petition from the school inspectors, praying for the reimbursement of their travelling expenses?

2. If so, is it the intention of the Government to effect this reform and to thus improve their position?

Answer by the Honorable Mr. Roy :—

1. Yes.
2. Under consideration.

By Mr. Delage.—1. Since when have cutting out schools existed in this Province?

2. What amount has been granted to the same, annually, since the inauguration of that policy?

3. What amount has been expended annually for such purposes?

4. Have the results obtained been satisfactory and, if so, does the Government intend to increase the number of these schools?

Answer by the Honorable Mr. Roy :—

1. Since the year 1898-99.
2. One school in.... 1898-99
 Five schools in.... 1899-00
 Nine schools in.... 1900-01
 Thirteen schools in.... 1901-1902

By Mr. Langlois.—1. Has the Provincial Board of Health sent a special report to the Government on the subject of mortality among children?

2. If not, does the Government intend to give the Provincial Board of Health instructions to make a serious study of what would be the best means to take to diminish the death rate among children in the Province of Quebec?

Answer by the Honorable Mr. Roy:—

I.

During the summer of 1906, a deputation from the Provincial Board of Health represented to the Government that the excessive infantile mortality rendered necessary the making of certain legislative enactments, and as the outcome of these representations, the Government sanctioned several regulations, which came into force after their publication in the *Official Gazette* of the 13th October, 1906. These regulations relate to the following subjects:

1. The obligation of maternities and infant asylums to give notice of their existence. 2. The obligation of these same institutions to make annual reports on the movement of their population. 3. Outside of these institutions the obligation of every person, with the exception, however, of a tutor or relative taking the charge of a child of less than five years, to make within a delay of 48 hours, the declaration thereof to the municipal authorities, and, in the event of the death of the child, to give notice of such death within 24 hours therefrom. 4. The purifying of the milk supply which forms the subject of 20 articles in the regulations of 1906.

II.

The statistics published by the Board of Health of the Province amply show that gastro-enteritis in this Province, as everywhere else, is the great destroyer of nurslings. The chief causes of gastro-enteritis are well known: deprivation of the mother's milk, bad food (contaminated milk, precocious use of farinaceous foods, etc.), neglect to call in the physician at the proper time and, finally, pauperism.

In addition to the legislative provisions above mentioned, the struggle against infant mortality includes the education of families in matters of infantile hygiene, and assistance.

Assistance is provided by various institutions, such as societies for aiding women and girls who are pregnant or who have given birth to children; maternal insurances, associations for supplying milk to the poor, advice regarding nurslings, day nurseries, foundling asylums and hospitals for nurslings.

Education in matters of infantile hygiene or the rearing of children, to be complete, must not only be brought within the reach of mothers of the present day by multiplying advice regarding nurslings, but should also prepare the mothers of the future for their missions. This should be done by teaching infantile hygiene in schools for young girls and in housekeeping schools.

The share the Board of Health can take in this struggle with infant mortality, is: 1. To draft the necessary legislation and regulations to diminish the causes; this it has done as set forth above. 2. To contribute to the education of mothers in matters of infantile hygiene; this it has endeavoured to do by publishing a pamphlet called "Milk in connection with the feeding of nurslings." 3. To stimulate physicians, municipalities and the public generally; this it has always done since its foundation, according to the resources at its disposal by periodical and special publications on the subject in addition to the campaign carried on by means of its monthly Bulletin.

Of course the Board of Health is always at the disposal of the Legislature for the purpose of studying any question it may be pleased to put to it.

“I urge you to carefully consider the financial situation. You will thereby understand that it has become necessary to practise the strictest economy and I call upon you to give your heartiest support to the efforts that my Government propose to make in that behalf.”

That,—notwithstanding the formal pledge contained in the Budget Speech of the late Honorable Mr. Marchand of the 7th February 1899, which pledge reads as follows: “On coming into power, the present Government had been entrusted with a mandate enjoining it to devote itself above all to restore equilibrium in our finances by reducing the expenditure through economy and by increasing the revenue without imposing fresh taxes.”—the ordinary expenses of the Marchand-Parent-Gouin Government show an enormous increase over those of DeBoucherville-Taillon-Flynn Government as established by the following statements :

4. Out of the amount voted by the act 60 Vict., chap. 3 (amended.)

Mr. Mousseau moved, seconded by Mr. Jobin, and the Question being put, That it be Resolved, That this House is of opinion that it is opportune to modify our municipal institutions by substituting vote by ballot for the open vote in the elections held under the provisions of the Municipal Code; the House divided: and it was resolved in the Affirmative.

The Honorable Mr. LeBlanc moved, seconded by Mr. Tellier, and the Question being put, That the entries in the Journals of this House of Monday, the 25th day of March last, ordering that the Bill (No. 179) to detach certain lots from the county of Dorchester and to annex them for all purposes to the county of Bellechasse, be read the third time and do pass, be rescinded, and that the Bill be placed on the Orders of the Day for second reading.

Mr. Speaker ruled this motion out of Order, as follows:

"It is admitted that it is according to parliamentary rules to rescind a motion, a resolution, a vote of the House. But that is not the point that attracted my attention when I read the notice of the motion submitted by the Honorable Member for Laval. It at once struck me as beyond recognised usage, as well as contrary to precedent, that the right to move the rescinding should be ample enough to cover at once the whole of the procedure on a bill, even when the bill had been finally passed and when the House had further ordered its transmission to the Legislative Council by a regular message.

Nevertheless, not wishing to decide the point without giving it all due consideration in view of the very special nature of the proposed motion, as well as of the precedent to be established in one sense or another, I deemed it my duty to ask the Honorable Member for Laval to cite precedents of cases similar to that now before us.

On my part, I have searched and have not found anywhere that the procedure on a bill that had passed its third reading and had been ordered to be sent to the other House, had been rescinded, set aside and begun over again as proposed.

I have no hesitation in expressing my opinion that the power to rescind cannot go so far and, under the circumstances, I consider it my duty to establish an important precedent by declaring that the motion of the Honorable Member for Laval is not in order."

The House, according to Order, again resolved itself into a Committee on the Bill (No. 160) to amend articles 1608 and 1642 of the Civil Code; and after some time spent therein, Mr. Speaker resumed the Chair; and Mr. Pelletier reported, That the Committee had gone through the Bill, and directed him to report the same, without any amendment.

And the Question being proposed, That the Bill be now read the third time.

The Honorable Mr. LeBlanc moved in amendment to the Question, seconded by Mr. Tellier, That the word "now" be left out and the words "this day six months" added at the end thereof.

And the Question being put on the amendment; the House divided: and the names being called for, they were taken down, as follow:

And then the House adjourned till to-morrow.

Wednesday, 8th April, 1908.

Pursuant to the Order of the Day, the following Petitions, severally praying for an act to amend the Quebec License Law, were read and received:

By Mr. Lémieux—Of Madame C. Beique, President of the Board of Directors of "La Federation Nationale St. Jean Baptiste, Ladies' Section of the Association St. Jean Baptiste, of Montreal"; of Madame Polyxene B. Leman, President of the Temperance Committee, of Lady M. L. Lacoste, of Madame Marie Gerin-Lajoie, of Madame R. Alma Bouthillier, of Madame M. G. Hugenin, of Madame A. B. Rottot, of Misses R. Barry, Maria Auclair, A. Bibaud, Sophronie Renault and others, of the city and district of Montreal.

Mr. Perrault, from the Select Standing Committee on Miscellaneous Private Bills, presented to the House the Sixteenth Report of the said Committee, which was read, as follows:

Your Committee have examined the following Bills and made certain amendments thereto, which they submit for the consideration of Your Honorable House:

Bill (No. 104) to incorporate The Clothing Manufacturers' Association of Montreal.

And Bill (No. 131) to amend the charter of the city of Montreal, with respect to general administration.

The promoter of the Bill (No. 123) respecting The Royal Institution for

the advancement of Learning, and the promoter of the Bill (No. 107) to amend the charter of the city of Montreal respecting exemption from annual assessments and taxation, having declared that they do not wish to proceed with their Bills, Your Committee recommend to Your Honorable House that leave be granted them to withdraw the said Bills.

Your Committee have also examined the following Bills and made certain amendments thereto, which they submit for the consideration of Your Honorable House :

Bill (No. 117) to divide the municipality of St. Octave de Métis.

Bill (No. 86) respecting the enlargement of the church of the parish of Les Saints Anges de Lachine.

Bill (No. 109) respecting the reconstruction of the church and sacristy of the parish of Saint François d'Assise de la Longue Pointe.

Bill (No. 88) to amend and consolidate the charter of the town of Westmount and incorporate it into a city.

And Bill (No. 124) to incorporate The Congregation Beth Judah of Montreal.

On motion of Mr. Walsh, seconded by Mr. Mercier, and with the unanimous consent of the House.

Ordered, That the Bill (No. 106) to amend the charter of the city of Montreal, as regards the expropriation of St. David's Lane, be withdrawn.

Mr. Speaker gave his decision on the Point of Order raised by the Honorable Mr. LeBlanc on Tuesday the 7th day of April, instant, That the name of Mr. Vilas should be struck from the division list of the members who voted on the amendment made to the second reading of the Bill (No. 151) to amend the act providing for a tax on transfers of shares, bonds or debentures or debenture stock, because that Honorable member had entered the House after the motion had been read, and the "Question" put, as follows :

The whole question may be summed up : Firstly—In the interpretation to be given to parliamentary usage which requires that a member must hear the motion read and the question put, not only to have the right to vote, but also to make it his duty to do so ; Secondly—As to what meaning it to be given, in a parliamentary sense, to the words : "in the House," with regard to the precincts in which our deliberations are held. After reading the authorities over again and consulting precedents, especially that of the 26th August 1891, in the House of Commons of Canada, I have come to the conclusion that it is not strictly binding upon a member to be present inside that portion of the Chamber divided off by the bar which separates it from the place reserved for the Honorable Legislative Councillors and from the galleries, when 'the question is put.'

I must ask the honorable member for Brome whether he heard the question read.

Mr. Vilas replied in the Affirmative.

Mr. Speaker then ruled that the vote of the Honorable member for Brome should be maintained.

Ordered, That Mr. Bissonnette (Montcalm) have leave to bring in a Bill (No. 197) to amend the License Law respecting inns and physicians and druggists.

He accordingly presented the said Bill to the House, and the same was received and read for the first time; and ordered to be read a second time, to-morrow.

Ordered, That Mr. Godbout have leave to bring in a Bill (No. 200) to amend article 1080 of the Municipal Code, respecting certain exceptional provisions.

He accordingly presented the said Bill to the House, and the same was received and read for the first time; and referred to the Select Committee on the Municipal Code.

By Mr. Lafontaine (Maskinongé).—1. How much has the Government paid in all to the interested parties in connection with the abolition of the agricultural school at L'Assomption?

2. To whom were such payments made?

3. Why did the Government deem it advisable to pay an indemnity in connection with the abolition of such school?

Answer by the Honorable Mr. Roy:—

1. \$16,000.00.

2. To Rev. G. V. Villeneuve, procurator of l'Assomption College.

3. In 1897, the Government came to the conclusion that the long term contract entered into in February, 1897 with the corporation of L'Assomption college, granted subsidies out of proportion to the services which the L'Assomption agricultural school had rendered and was in a position to render to the farming classes, and decided to cancel it.

But, inasmuch as the said corporation had put up expensive buildings wherefrom it could derive no benefit, it was only equitable to take into account to a certain extent, the expenditure so incurred in good faith.

The amount at first exacted by the corporation of L'Assomption College was nearly \$30,000.00, but after negotiations, the indemnity was agreed upon by both parties at \$15,000.00, payable in three instalments, in addition to an amount of \$1,000.00 payable in one sum, because the school had remained open during the negotiations for a certain number of months.

By Mr. Langlois—1. On what basis or data are the moneys for classical colleges in this Province distributed?

2. Is such distribution made to the various institutions at so much per head of the pupils attending them or merely based on the acknowledged or granted value of such institutions?

Answer by the Honorable Mr. Roy:—

1. The grants made to the classical colleges under article 444 of the Education Act are recommended by the Council of Public Instruction.

2. The distribution is made according to the needs of those institutions.

By Mr. Panet—Does the Government intend to open up the township of Marmier, county of Champlain, to colonization?

Answer by the Honorable Mr. Turgeon:—

Yes, after classification.

By Mr. Langlois—1. What are the agricultural schools subsidized by the Government of the Province of Quebec?

2. What is the amount annually paid to each of such schools?

3. How many of the students issuing from such agricultural schools since 1897 have settled on farms and devoted themselves to agriculture?

Answer by the Honorable Mr. Roy :—

1. The School of Ste. Anne de la Pocatière and that of Notre Dame du Lac, Oka.

2. Ste. Anne, \$2,500 plus \$600 for the professor of agriculture and \$7.00 per month for each student over the 10 bursary students.

Oka—\$5,500 per annum and \$7 per month for each student.

3. No official information on this head.

By Mr. Kelly—1. What amounts of stumpage dues have been paid to the Government since November 4th, 1905, in the Eastern Division of the Crown Land Agency of the county of Bonaventure?

2. What is the name, address, date of payment, and amount paid by each person, corporation or partnership since said date?

3. What amount has been paid in said agency since 4th November, 1905, for settlers' lots, including lots taken since said date, and amounts paid since said date on lots sold previous to 4th November, 1905?

4. What is the name, address, date of payment, and amount paid by each person?
